THE BIG BLUE BASTARD ROCKS TOPCON

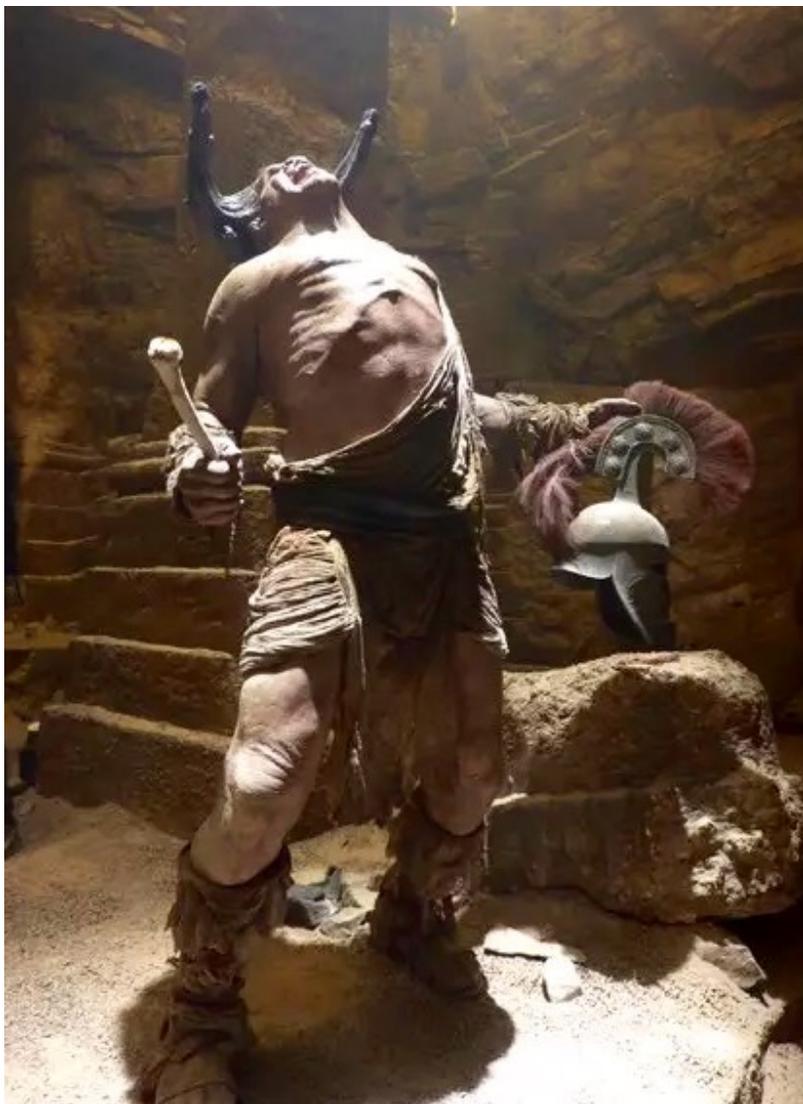

SPENCER WILDING; If you do not know the name you know the faces and if you know the faces then you are a fan of one of the biggest character actors in film. And we mean big in every way. The giant 6' 7" Welsh Actor will be coming to the United States to meet & greet fans at TOPCON GEEK EXPO 2016.

From three spine tingling turns in the Harry Potter Series to three villainous alien turns on Doctor Who Spencer Wilding plays characters that have an Evil Twist with finesse and skill.

Not since the great Lon Chaney, the Man with a Thousand Faces, has a character actor had such a prolific career in faces other than his own. Lon Chaney created his own makeup effects and Spencer Wilding has the best makeup artists in the business create his. But all the great makeup in the world is nothing more than face paint if the actor does not have the talent to bring it to life; Spencer Wilding has the talent and brings each character he plays to life.
